Inmarsat BGAN Prepaid - Terms and Conditions
- Prepaid rate plans must be activated on a Global or Geo Prepay SIM.
- Since June 2016, all BGAN Prepaid Vouchers (Type 12) support Streaming IP and ISDN services.
- Voucher not activated within 90 days after issuing will
- Voucher validity is 365 days.
- Usage is decremented on a unit basis against the balance on a subscriber's account, not in a minute basis.
- No outgoing calls will be connected if the balance is at zero but incoming calls can be received.
- Please note that 0 units voucher is cumulative: 30 days time validity will be added x times the voucher is credited. For instance, if two (2) vouchers are added, 60 days validity is credited ; if three (3) vouchers are added, 90 days validity is credited.

Inmarsat BGAN

Additional Services:

Service	Description	Cost
FlightStream SA	The service enables basic compression techniques and enables advanced firewall features which allows you to block access to costly high-bandwidth websites such as YouTube, in addition to selected media content types such as flash, videos and even images. This allows our customers to streamline their internet connection with just the features you want. FlightStream SA does not require the installation of hardware or software on individual's computers or mobile devices. More information.	\$0
Smart Call	Smart Call allows users to place calls to the terminal using our 1-800 number from any location in the world using a two-step dialing process (1-800 number and PIN). Registering your landline phone number in our system allows just the 1-800 number to be called without having to use a PIN code. More information.	\$0
Smart Call Plus	Smart Call Plus allows users to place calls directly to the terminal located anywhere in the world by simply dialing a pre-assigned 10 digit terrestrial number. Prefixes are available for most countries or cities. More information.	\$20 / Month
Advanced Interconnection: Live Video / Advanced Security / Encryption		
Our advanced interconnection solutions are customizable and designed for customers that want to stream live video and/or have a need for advanced security or to implement encryption.		
Custom IP Address <ul style="list-style-type: none"> • Public Static • Private Static 	<p>“Public.Static” type guarantees a dedicated public IP address to a BGAN terminal. It facilitates the implementation of various business applications like remote access or corporate access.</p> <p>“Private.Static” IP sessions are securely terminated at the customer’s or end-user’s premises and can be used to enable static authentication mechanism based on the BGAN terminal fixed IP address. “Private.Static” is also a solution of choice when mobile-to-mobile communication is required.</p>	Call
Custom Interconnection Solutions	ISDN, IPsec, VPN Tunnel, and MPLS	Call
